Auckland Vending

Established in 1998 AV provides a complete vending service. From site evaluations to machine recommendations, to product advice and supply, we will customise the right vending solutions to your business. We have more than 400 food and drink products available to us from various suppliers and we continue to review and modify product selection according to customer feedback.

Unbiased advice

As we are not tied to a single supplier we can offer truly unbiased advice. Our association with the fitness industry has also given us experience in vending health food products.

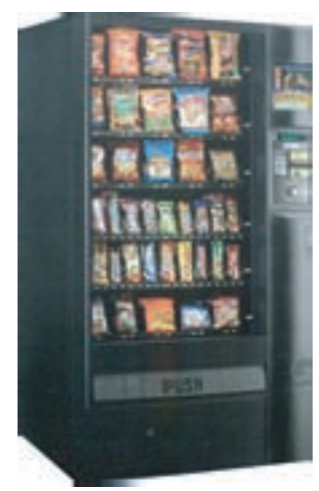

Modern Technology

We import state-of-the-art vending machines from leading international vending manufacturers. These machines are reliable and aesthetically appealing and a wide variety of sizes and configurations are available. We use our experience to determine which machine/s will best suit your company.

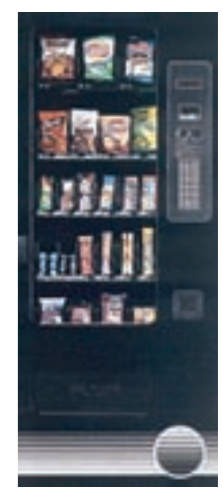

Customer Service

We are proud of our client list and the fact that many have come to us by recommendation. We service some of New Zealand's largest organisations such as banks, telecommunications, accounting and legal firms. They employ hundreds of staff. We are happy to provide references.
